

COURSE SLIDES

Agentic AI for Instagram Marketing (C695)

Course Code: C695

Conducted by Tertiary Infotech Academy Pte Ltd · UEN 201200696W

Version v1.0 · 3 August 2026

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

COURSE ADMINISTRATION

Welcome & Housekeeping

About the Trainer

Course Trainer

Principal Trainer
Tertiary Infotech Academy Pte. Ltd.

ROLE

Principal Trainer, Tertiary Infotech Academy Pte. Ltd.

CERTIFICATION

Digital marketing and applied AI practitioner

DELIVERS

Instagram marketing, digital advertising, analytics, and applied AI workflows

FOUNDER

Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

Let's Know Each Other

- 1 Your name, role, and the Instagram Professional account or business context you support.
- 2 One Instagram content, community, or reporting task that currently takes too much time.
- 3 One public-facing or budget decision you would never allow an AI agent to make without approval.

Ground Rules

1

Set your mobile phone to silent mode.

2

Participate actively — no question is too small.

3

Mutual respect: agree to disagree.

4

One conversation at a time.

5

Be punctual; return from breaks on time.

6

Learn by doing — try every hands-on lab.

Download Course Material

Portal: <https://lms-tms.tertiaryinfotech.com>

Lesson Plan — 2 Days, 8 hours/day

Day 1

- Day 1 — Agent foundations, prompting, Instagram content, and scheduling
 - Topic 1: Foundations of Agentic AI for Instagram Marketing (Labs 1–2)
 - Topic 2: AI-Powered Content Creation and Scheduling (Labs 3–4)

Day 2

- Day 2 — Community automation, analytics, ads, and governed optimisation
 - Topic 3: Automating Engagement and Community Management (Labs 5–6)
 - Topic 4: Analytics, Ads and Optimisation with AI Agents (Labs 7–8)
- Daily timing
 - 9:00 am - 6:00 pm (1-hour lunch; two 15-minute tea breaks)

Learning Outcomes

1

Agent Foundations

Explain AI agents and map an Instagram customer journey, account readiness, tools, prompts, evidence, and human approval gates.

2

Content System

Generate an on-brand Instagram content system with captions, hashtags, image and Reels briefs, a calendar, and a controlled publishing workflow.

3

Community Workflow

Design a governed engagement workflow for comments, direct messages, lead capture, follow-up, reviews, and user-generated content.

4

Responsible Practice

Apply privacy, copyright, platform, brand, and escalation rules to Instagram content and community-management decisions.

5

Analytics

Calculate and interpret Instagram organic and paid metrics, then produce an evidence-linked performance report and dashboard.

6

Ads Optimisation

Design an AI-assisted Instagram ads and retargeting optimisation loop for audience, budget, and creative decisions with human authority.

How You'll Learn

CORE CONCEPTS

Agentic Instagram Marketing Operating System

The Five Decisions Every Workflow Must Preserve

1

Why

Which business result and customer action matter?

2

Who

Which evidence-backed audience need are we serving?

3

What

Which promise, proof, offer, and creative communicate value?

4

Where

Should the message use organic, paid, or community delivery?

5

Next

Which metric and rule determine the next controlled action?

The G-C-A-T-E Agent Framework

1

Goal

Business result, customer action, KPI, time horizon, and finish condition.

2

Context

Brand, offer, audience evidence, channel role, and authorised inputs.

3

Actions

Ordered steps and tools the workflow may use.

4

Tests

Factual, brand, privacy, advertising, and performance checks.

5

Escalation

Approval gates, stop conditions, owner, and recovery path.

OPERATING PRINCIPLE

Let AI accelerate the loop; keep people accountable for the outcome.

Drafting and analysis can move quickly only when goals, evidence, permissions, and approval gates are explicit.

The Instagram Operations Pack You Will Build

Foundation Pack

- Success brief
- Journey map
- Account readiness
- Prompt contract

Content & Community

- Content kit
- Calendar workflow
- Response router
- UGC register

Insight & Growth

- Metrics dashboard
- Ads blueprint
- Retargeting and optimisation policy

How Every Lab Progresses

1

Start from the shared Harbour & Hearth brand brief and the previous lab checkpoint.

2

Use AI to propose structured work from authorised inputs, not to invent business facts.

3

Apply a human quality gate and record corrections in the campaign operations pack.

4

Verify observable evidence before carrying the artifact into the next lab.

TOPIC 01

Foundations of Agentic AI for Instagram Marketing

agents and workflows | tool choices | Professional account readiness | prompting | customer journey

Key Concepts — Foundations of Agentic AI for Instagram Marketing

1

Outcome before output

Start with a business result and customer action, not a request to 'make posts'.

2

Organic and paid roles

Organic content builds attention and proof; paid delivery buys controlled reach and learning.

3

Agentic loop

An agent plans, uses tools, checks evidence, and iterates until a stop condition is reached.

4

Evidence boundary

Facts, customer data, and performance numbers need provenance; unknowns remain labelled assumptions.

5

Prompt contract

Role, goal, context, inputs, rules, output schema, and review criteria make work repeatable.

6

Audience hypothesis

A segment is a testable need and behaviour pattern, not a stereotype or invented demographic.

Key Concepts — Foundations of Agentic AI for Instagram Marketing (cont.)

7

Human authority

Publishing, spend, targeting changes, and sensitive replies remain approval-controlled actions.

8

Audit trail

Save the brief, inputs, versions, approvals, and final decision so the workflow can be reviewed.

Instagram Marketing as a Connected System

From Generative AI to an Agentic Workflow

Single AI task

- One prompt produces one draft
- The user manually supplies every input
- No persistent state or explicit stop rule
- Quality depends on one response

Agentic workflow

- A goal is decomposed into multiple steps
- Tools retrieve data or create controlled outputs
- State, checks, retries, and stop conditions are explicit
- A person approves high-impact actions

The Six-Part Marketing Agent

1

Goal

The result, customer action, time horizon, and success threshold.

2

Context

Brand, offer, audience evidence, channel role, and constraints.

3

Instructions

Decision rules, required steps, output format, and escalation logic.

4

Tools

Approved data sources, content tools, calendars, and reporting surfaces.

5

Memory

Briefs, past variants, decisions, and lessons that should persist.

6

Checks

Brand, factual, privacy, policy, and performance validation before action.

Choose Tools by Role, Permission, and Risk

1

ChatGPT or Claude

Develop briefs, structured drafts, critique, classification, and analysis from approved inputs.

2

Image tools

Explore visual concepts and storyboards; retain provenance and verify product truth.

3

Meta Business Suite

Review profiles, drafts, Planner, Inbox, and insights with account-based permissions.

4

n8n

Connect triggers, data, AI steps, review gates, logs, retries, and bounded actions.

5

Spreadsheets

Hold calendars, response queues, metric definitions, and decision logs in a reviewable form.

6

Instagram API

Supports approved professional-account publishing, insights, comments, and messaging use cases subject to permissions and limits.

Professional Account and Automation Readiness

Objective, Customer Action, and KPI Chain

Audience Evidence Before Targeting

1

Observed

Existing customer questions, purchases, site behaviour, and Instagram interactions.

2

Declared

Needs and preferences people voluntarily shared through interviews or forms.

3

Inferred

A labelled hypothesis derived from patterns, never presented as fact.

4

Excluded

Sensitive traits, unjustified personal data, and segments the offer should not reach.

5

Testable

A need, trigger, barrier, message angle, and measurable response.

6

Revisable

A segment changes when evidence contradicts the original hypothesis.

The Prompt Contract

Hands-On Labs — Foundations of Agentic AI for Instagram Marketing

Lab 1

- Map the Instagram Customer Journey and Account Readiness

Lab 2

- Write and Test the Instagram Agent Prompt Contract

Map the Instagram Customer Journey and Account Readiness

LAB 1

You begin the connected Harbour & Hearth scenario by turning an approved synthetic brand brief and audience signals into a measurable Instagram customer journey. You then complete a Professional-account readiness and tool-permission map so every later agent knows what it may read, draft, recommend, or hand to a human.

You'll build

C695-campaign-pack/01-foundation-and-readiness.md containing the decision chain, five-stage customer journey, tool-role map, account-readiness checklist, risk tiers, and approval gates.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 1 — Key Route

Write and Test the Instagram Agent Prompt Contract

LAB 2

You convert the foundation and readiness map into a G-C-A-T-E prompt contract that governs the remaining course work. The contract tells an AI agent what goal to pursue, which evidence it may use, what tools and actions are allowed, how outputs are checked, and when it must stop for a person.

You'll build

C695-campaign-pack/02-agent-prompt-contract.md containing the G-C-A-T-E instructions, permission matrix, output schema, test cases, corrections, and final behaviour.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 2 — Key Route

Recap — Foundations of Agentic AI for Instagram Marketing

1

You can now: LO1: Explain AI agents and map the customer journey, account readiness, tools, evidence, and approval gates for an Instagram workflow

2

You can now: LO1: Create and test reusable agent instructions with grounded inputs, tool permissions, output checks, escalation rules, and failure behaviour

TOPIC 02

AI-Powered Content Creation and Scheduling

posts, captions and hashtags | images and Reels | content calendar agent | scheduling | brand consistency

KEY CONCEPTS

Key Concepts — AI-Powered Content Creation and Scheduling

1

One message hierarchy

Audience tension, promise, proof, offer, and action align every content format.

2

Content pillars

Repeatable themes create variety without losing strategic focus.

3

Hook with relevance

Earn attention by naming a useful tension, not by exaggerating or withholding truth.

4

Proof before pressure

Specific evidence reduces uncertainty more effectively than louder claims.

5

Format follows job

Image, carousel, and video choices should match the message and stage of awareness.

6

Brand voice rules

Observable language patterns are easier for AI to follow than vague adjectives.

KEY CONCEPTS

Key Concepts — AI-Powered Content Creation and Scheduling (cont.)

7

Variant discipline

Change one meaningful variable at a time so later performance can teach you something.

8

Human creative review

Check accuracy, rights, representation, readability, and platform fit before use.

The Instagram Message Hierarchy

Content Pillars and the Customer Journey

1

Teach

Answer a useful question and build problem awareness.

2

Show

Demonstrate the product, process, or customer experience.

3

Prove

Use evidence, reviews, comparisons, or behind-the-scenes detail.

4

Invite

Present an offer and make the next action unmistakable.

5

Engage

Ask a meaningful question or respond to community signals.

6

Learn

Use performance and comments to refine the next content cycle.

Brand Voice as Observable Rules

Weak instruction

- Sound friendly and premium
- Make it engaging
- Use our usual tone
- Avoid sounding robotic

Operational rule

- Use warm, direct sentences of 8-18 words
- Open with a specific customer situation
- Use Singapore English naturally; avoid forced slang
- One helpful detail before one invitation

Caption and Hashtag System

Creative System: Image, Carousel, Stories, and Reels

1

Single image

One idea, one focal point, fast recognition, strong offer or proof.

2

Carousel

A sequence, comparison, product range, or step-by-step story.

3

Stories

Timely updates, interaction prompts, reminders, and sequential moments.

4

Reels

Motion, demonstration, personality, transformation, or process.

5

First-frame clarity

Make the subject and value understandable without sound; use simple composition and safe cropping.

6

Rights and truth

Use authorised assets; review generated details, product accuracy, and implied claims.

Content Calendar Agent and Publishing Control

Content Quality Gate

Hands-On Labs — AI-Powered Content Creation and Scheduling

Lab 3

- Create the Instagram Content and Creative Kit

Lab 4

- Build the Content Calendar Agent and Publishing Workflow

Create the Instagram Content and Creative Kit

LAB 3

You use the approved journey and prompt contract to create a seven-item Instagram content kit for Harbour & Hearth. The kit covers feed posts, a carousel, Stories, and Reels while preserving one message hierarchy, observable brand-voice rules, relevant hashtags, creative rights checks, and a clear customer action.

You'll build

C695-campaign-pack/03-instagram-content-kit.md containing seven content briefs, reviewed captions, hashtag rationales, image or storyboard directions, a brand consistency score, and a rights log.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 3 — Key Route

Build the Content Calendar Agent and Publishing Workflow

LAB 4

You convert the reviewed content kit into a seven-day Instagram calendar and a draft-first publishing workflow. The workflow can prepare and validate a schedule, but it stops at the human approval gate before Meta Business Suite or an API publishing action.

You'll build

C695-campaign-pack/04-calendar-and-publishing-workflow.md plus **04-instagram-calendar.csv** containing seven scheduled drafts, validation rules, a node-by-node n8n-style workflow, approval evidence, error handling, and a dry-run log.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 4 — Key Route

Recap — AI-Powered Content Creation and Scheduling

1

You can now: LO2: Generate an on-brand Instagram content system with captions, hashtags, image briefs, and Reels ideas grounded in approved evidence

2

You can now: LO2: Build a brand-consistent calendar agent and controlled scheduling workflow with approval, duplicate prevention, failure handling, and verification

TOPIC 03

Automating Engagement and Community Management

comments and direct messages | lead capture | personalised responses | reviews and UGC | privacy and responsible AI

Key Concepts — Automating Engagement and Community Management

1

Intent before tone

Identify what the person needs and the risk of the request before writing a polished reply.

2

Public or private

Keep general information public; move order, contact, payment, and sensitive details to an approved private channel.

3

Minimum data

Capture only the fields needed for the stated follow-up and keep raw personal data out of AI prompts.

4

Consent and purpose

Explain why information is requested and use it only for the authorised purpose and retention period.

5

Personalise from context

Adapt approved facts and language without inferring sensitive traits or inventing familiarity.

6

Escalate impact

Safety, allergy, payment, complaint, privacy, legal, and order-change cases need a named human owner.

Key Concepts — Automating Engagement and Community Management (cont.)

7

UGC requires permission

A public mention is not automatic permission to reuse a person's image, words, name, or likeness.

8

Learn from labels

Store intent, risk, decision, correction, and outcome so rules improve without retaining unnecessary content.

Engagement Is a Service Workflow

Intent and Risk Routing

1

Informational

Approved hours, location, product contents, process, or link; draft from the knowledge source.

2

Commercial

Product fit or availability; answer approved facts and invite one authorised next step.

3

Lead

A person asks for follow-up; request the minimum fields through an approved private route.

4

Service

An order-specific request; authenticate and hand off to the service owner.

5

Sensitive

Health, payment, privacy, legal, or safety content; stop and escalate immediately.

6

Abuse or spam

Apply documented moderation rules and preserve context for review.

Lead Capture and Follow-Up Automation

Personalised Responses and Escalation Rules

Safe personalisation

- Use the stated question and approved context
- Mirror formality without imitating identity
- Offer one relevant authorised next step
- Acknowledge uncertainty and hand off clearly

Escalate or refuse

- Do not infer health, wealth, ethnicity, or vulnerability
- Do not confirm refunds, order changes, or compensation
- Do not request credentials or sensitive data in public
- Do not argue about safety, privacy, legal, or crisis claims

Reviews and User-Generated Content

Privacy, Copyright, and Responsible AI Gate

1

Purpose

Is the use appropriate, explained, and limited to the intended service or marketing purpose?

2

Data

Can identifiers, message content, or metadata be minimised, masked, or avoided?

3

Rights

Do we have authority to use the image, music, words, name, likeness, and brand assets?

4

Truth

Are claims, urgency, endorsements, and product details supported by approved evidence?

5

Fairness

Does the output avoid stereotypes, exclusion, manipulation, and unsupported sensitive inference?

6

Accountability

Is there a reviewer, decision log, correction path, and disable switch?

Hands-On Labs — Automating Engagement and Community Management

Lab 5

- Build the Comment and Direct-Message Response Router

Lab 6

- Create the UGC, Review, Privacy and Escalation Runbook

Build the Comment and Direct-Message Response Router

LAB 5

You design a community agent that routes eight synthetic Instagram comments and direct messages without exposing identifiers or promising unauthorised outcomes. The router drafts from approved facts for routine cases, captures only minimum lead fields, and stops for safety, allergy, payment, refund, privacy, or order-specific requests.

You'll build

C695-campaign-pack/05-community-response-router.md plus 05-response-queue.csv containing the intent taxonomy, risk rules, minimum-data lead schema, reviewed response drafts, escalation owners, and a workflow dry-run.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 5 — Key Route

Create the UGC, Review, Privacy and Escalation Runbook

LAB 6

You extend the community router with a rights and responsibility gate for reviews and user-generated content. The runbook records permission scope, checks AI drafts for truthful and fair treatment, and gives the team a practical response when content, privacy, or automation goes wrong.

You'll build

C695-campaign-pack/06-ugc-and-governance-runbook.md plus **06-ugc-permission-register.csv** containing rights decisions, privacy and truth checks, escalation templates, retention rules, and an incident simulation.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 6 — Key Route

Recap — Automating Engagement and Community Management

1

You can now: LO3: Design a governed workflow for comment and direct-message intent, risk, lead capture, personalised drafts, follow-up, and human escalation

2

You can now: LO4: Apply privacy, copyright, platform, brand, and escalation rules to reviews, user-generated content, community responses, and AI-supported incident handling

TOPIC 04

Analytics, Ads and Optimisation with AI Agents

Instagram Insights | reports and dashboards | ads | audience, budget and creative | retargeting | feedback loops

KEY CONCEPTS

Key Concepts — Analytics, Ads and Optimisation with AI Agents

1

Define before calculating

Every metric needs a source, numerator, denominator, window, scope, and known limitation.

2

Separate reach from views

Unique accounts and repeated displays answer different delivery questions.

3

Follow the funnel

Content discovery, interaction, profile action, site action, conversion, and value are different transitions.

4

Report evidence

A narrative claim must point to a metric, period, comparison, source row, and uncertainty.

5

Ads hierarchy

Campaign objective, ad-set audience and budget, and ad creative must agree with the customer action.

6

Diagnose before changing

Validate data and locate the weak transition before choosing a lever.

Key Concepts — Analytics, Ads and Optimisation with AI Agents (cont.)

7

Retarget responsibly

Use authorised signals, exclusions, retention, frequency, and customer expectations.

8

One controlled change

Set a hypothesis, approval, observation window, guardrails, and rollback before iterating.

Instagram Insights and the Metric Tree

1

Delivery

Views, impressions where available, accounts reached, and follower or non-follower distribution.

2

Interaction

Likes, comments, saves, shares, replies, and accounts engaged.

3

Intent

Profile visits, link clicks, website taps, messages, and lead actions where configured.

4

Conversion

Completed orders or leads from an authorised commerce or analytics source.

5

Paid

Spend, result count, cost per result, CPM, CTR, CPC, CPA, and attributed value.

6

Guardrails

Negative feedback, complaint rate, rights concerns, tracking health, and fulfilment capacity.

Automated Reports and Decision Dashboards

AI-Assisted Instagram Ads Campaigns

1

Campaign

Choose the objective that matches the larger business goal and experiment context.

2

Ad set

Define audience role, conversion location, event, budget, schedule, placements, and exclusions.

3

Ad

Align identity, format, creative, primary text, destination, and tracking.

4

Preflight

Verify account, permissions, event, destination, claims, rights, naming, and approval.

5

Agent role

Draft structures, detect contradictions, calculate options, and recommend; do not activate spend.

6

Human role

Own objective, data rights, budget, final creative, activation, monitoring, and rollback.

Audience, Budget, and Creative Optimisation

Evidence pattern

- Delivery cost or frequency changes
- Healthy delivery but weak qualified action
- Strong click or profile action, weak conversion
- One creative angle consistently differs

Bounded investigation

- Inspect audience pressure, placement, seasonality, and auction context
- Inspect creative relevance, promise, format, and call to action
- Inspect destination, offer, event quality, friction, and attribution
- Run a one-variable test with stable audience, budget, and window

Retargeting by Customer State

Continuous Improvement with a Governed Feedback Loop

Hands-On Labs — Analytics, Ads and Optimisation with AI Agents

Lab 7

- Build the Instagram Insights Dashboard and Evidence-Linked Report

Lab 8

- Design and Simulate the Instagram Ads, Retargeting and Optimisation Loop

Build the Instagram Insights Dashboard and Evidence-Linked Report

LAB 7

You validate a synthetic Instagram performance export, calculate clearly defined organic and paid metrics, and build a compact decision dashboard. The report separates observation from hypothesis, cites source rows and date scope, protects guardrails, and recommends one controlled learning action.

You'll build

C695-campaign-pack/07-insights-dashboard.xlsx plus optional **07-insights-dashboard-flat.csv** and **07-performance-report.md** containing validated calculations, format comparisons, funnel diagnosis, source-linked findings, caveats, and one bounded recommendation.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 7 — Key Route

Design and Simulate the Instagram Ads, Retargeting and Optimisation Loop

LAB 8

You complete the connected course pack with an AI-assisted Instagram ads blueprint and a bounded continuous-improvement policy. You then run eight synthetic scenarios through the policy to prove that strong numbers cannot override tracking, customer, rights, capacity, cooldown, or human-approval guardrails.

You'll build

C695-campaign-pack/08-ads-retargeting-optimisation-runbook.md plus **08-decision-log.csv** and **08-course-pack-manifest.md** containing the campaign hierarchy, audience roles, budget and creative hypotheses, retargeting data map, bounded policy, scenario decisions, rollback plan, and a validated inventory of artifacts 01 to 08.

Resources: Use the matching lab's prerequisites and supplied files.

Lab 8 — Key Route

Recap — Analytics, Ads and Optimisation with AI Agents

1

You can now: LO5: Calculate and interpret Instagram organic and paid metrics, then produce a source-linked dashboard, diagnosis, and bounded next action

2

You can now: LO6: Design a human-governed Instagram ads and retargeting loop for audience, budget, and creative decisions using evidence, limits, approval, cooldown, and rollback

WRAP-UP

Course Summary & Next Steps

What You Achieved

1

Agent Foundations

Explain AI agents and map an Instagram customer journey, account readiness, tools, prompts, evidence, and human approval gates.

2

Content System

Generate an on-brand Instagram content system with captions, hashtags, image and Reels briefs, a calendar, and a controlled publishing workflow.

3

Community Workflow

Design a governed engagement workflow for comments, direct messages, lead capture, follow-up, reviews, and user-generated content.

4

Responsible Practice

Apply privacy, copyright, platform, brand, and escalation rules to Instagram content and community-management decisions.

5

Analytics

Calculate and interpret Instagram organic and paid metrics, then produce an evidence-linked performance report and dashboard.

6

Ads Optimisation

Design an AI-assisted Instagram ads and retargeting optimisation loop for audience, budget, and creative decisions with human authority.

Put the Workflow into Practice

1

Choose one authorised Instagram offer and rebuild the campaign pack in draft mode.

2

Measure reviewer corrections and turn repeated failures into clearer rules or examples.

3

Pilot one low-risk automation with an owner, stop rule, log, and rollback path.

4

Review performance and customer-impact guardrails before increasing autonomy or spend.

Keep Practising After the Course

1

Re-run the labs on your own machine — repetition is what makes the skills stick.

2

Apply the techniques to a real process or project in your own organisation.

3

Your course material stays available at <https://lms-tms.tertiaryinfotech.com/>.

4

Explore the follow-on courses at www.tertiarycourses.com.sg.

C695 · KEEP BUILDING, CHECKING, AND LEARNING

Thank You!

You can now coordinate Instagram strategy, content, scheduling, community care, analytics, ads, and optimisation as one evidence-led, human-governed system.
