Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Explain AI agents and map an Instagram customer journey, account readiness, tools, prompts, evidence, and human approval gates.
- LO2: Generate an on-brand Instagram content system with captions, hashtags, image and Reels briefs, a calendar, and a controlled publishing workflow.
- LO3: Design a governed engagement workflow for comments, direct messages, lead capture, follow-up, reviews, and user-generated content.
- LO4: Apply privacy, copyright, platform, brand, and escalation rules to Instagram content and community-management decisions.
- LO5: Calculate and interpret Instagram organic and paid metrics, then produce an evidence-linked performance report and dashboard.
- LO6: Design an AI-assisted Instagram ads and retargeting optimisation loop for audience, budget, and creative decisions with human authority.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
