

Bounded Codex task

Outcome

Turn an outcome contract into a bounded plan, implement one TaskBoard feature and verify the changed behavior.

Task prompt

Add priority filtering to TaskBoard. Preserve the CLI contract, add tests, and finish only when the focused and regression checks pass.

Constraints

- Work only in the learner copy inside this lab.
- Preserve public behavior unless the task explicitly changes it.
- Do not change expected tests to force a pass.
- Do not access the network, external accounts, credentials or personal data.

Definition of done

The diff is scoped, the new behavior is tested, all supplied tests pass and the final summary cites evidence.
