

Labs — Agentic AI Applications with Codex

C695 · 18 labs · one startup, from idea to fully operational.

The scenario

Grace Lim spent twelve years as a hotel pastry chef. In August 2026 she signed leases on two small teaching kitchens — the Orchard Road Bakehouse for baking and the Bukit Timah Culinary Campus for cooking — and drafted 20 hands-on courses from S\$160 to S\$1,580. She has six months of savings, one part-time administrator, seven freelance chefs, and a first term that starts on Saturday 10 October 2026.

She cannot afford an agency, a developer and a marketing team. She has the ChatGPT desktop app. You are her AI-assisted team for the next two days:

Validate — find out who will pay, and how much (Chat, Work)

Build — the website, sign-ups and a course assistant (Codex)

Operate — prices, timetable, enrolment and service (Work)

Grow — brand, content and the open-house campaign (Work, Codex)

Every lab starts from what the previous lab produced. The data is fictitious but internally consistent, and every learner email address in it resolves to your own inbox.

The labs

#	Lab	Day	Surface	Time
01	[Validate the Idea with Chat and Work] (lab-01-validate-the-idea/README.md)	1	Chat → ChatGPT Work → @Sites	25 min
02	[Plan and Build the Site with /plan] (lab-02-plan-and-build-the-site/README.md)	1	Codex	30 min
03	[Project Rules and a Sign-up Form for Every Course] (lab-03-rules-and-signup-forms/README.md)	1	Codex	30 min

04	[Publish the Site: GitHub Pages and Sites](lab-04-publish-the-site/README.md)	1	Codex → GitHub Pages → @Sites	25 min
05	[Turn the Brochures into a SQLite Knowledge Base] (lab-05-sqlite-knowledge-base/README.md)	1	Codex	25 min
06	[Build the Course Assistant and Drive It with /goal](lab-06-course-assistant-and-goal/README.md)	1	Codex	30 min
07	[Add ChatGPT Mode, Then Try to Break It](lab-07-chatgpt-mode-and-red-team/README.md)	1	Codex	25 min
08	[QA the Whole Site with @Computer Use](lab-08-qa-with-computer-use/README.md)	1	Codex + Computer Use	25 min
09	[Install Community Skills from skills.sh] (lab-09-skills-from-skills-sh/README.md)	1	Codex	25 min
10	[Create Custom Codex Skills] (lab-10-custom-codex-skills/README.md)	1	Codex	25 min
11	[Guard Rails That Run Themselves] (lab-11-guard-rails-that-run-themselves/README.md)	1	Codex → GitHub Actions → Scheduled	30 min
12	[Price the Courses and Find Break-even](lab-12-price-the-courses/README.md)	2	ChatGPT Work + @Drive → Chat	45 min
13	[Put the Term on the Calendar](lab-13-term-on-the-calendar/README.md)	2	ChatGPT Work + @Drive + @Calendar	40 min
14	[Enrol the Learners and Automate Reminders](lab-14-enrol-and-remind/README.md)	2	ChatGPT Work + @Drive + @Gmail → Scheduled	45 min
15	[Customer Service with a ChatGPT Skill](lab-15-	2	Chat → ChatGPT Work (@skill-creator, @Gmail,	45 min

	customer-service/README.md)		event trigger)	
16	[Marketing Know-how as Skills, Then the Flyer](lab-16-marketing-skills-and-flyer/README.md)	2	Chat → Codex (\$skill-creator, \$imagegen)	40 min
17	[A Multi-Agent Content Studio] (lab-17-multi-agent-content-studio/README.md)	2	Codex (custom agents + custom skills)	55 min
18	[Lead Magnet, Newsletter and the Open-House Campaign](lab-18-open-house-campaign/README.md)	2	Codex (skills.sh) → ChatGPT Work (@Gmail, analysis)	50 min

Before you start

- ChatGPT desktop app on a plan with Codex, ChatGPT Work and Sites.
- Node.js 22, Python 3, Git and a GitHub account.
- A personal Google account for Drive, Calendar and Gmail.
- One working folder, cook - and - bake, for Labs 2–11.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password or personal data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without your explicit approval.
